				PHOTOSHOP

WORK EXPERIENCE

SOFTWARE DEVELOPER @ AGENCY73
May 2018 - Current

• Lead developer of a start-up software consulting company. Given the opportunity to define processes, service offerings, and implement a handful of new tools to help us work more effectively.
• Transform web design mockups & wireframes into responsive, fully functional custom Shopify and Wordpress websites for small to medium-sized businesses.
• Assigned to a 5-month project to develop an anomaly detection marketing application for our internal holdings company. My involvement was to build out a clean, visual and dynamic user interface (UI) using the Vue.js framework.

JUNIOR WEB DEVELOPER @ ORGANIK SEO
July 2017 - April 2018

• Developed web applications in a MAMP stack (Mac, Apache, MySQL, PHP).
• Handled staging to live deployments through Beanstalk and managed pre & post launch checklists.
• Accessed remote directories with File Transfer Protocol (FTP) in order to create local & staging environments and to make live HTML, CSS and PHP edits.
• Implemented features to existing client websites such as responsive design, image gallery sliders, call-to-action banners and email marketing integrations.

FREELANCE WEB DEVELOPER
March 2017 - July 2017

• Designed and developed a Shopify store for a beverage accessory company.
• Rapid prototyping of email templates and converted designs into HTML.

WEB DEVELOPMENT INTERN @ SCIENTIST.COM
February 2017 - March 2017

• Implemented a shipment/tracking API for both the customer and supplier portion of the web app.
• Utilized HTML, JavaScript, jQuery and Bootstrap for the front-end, and Ruby and CouchDB for the back-end.
• Responsible for testing the features and it's responsiveness across all browsers and devices.
